## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 1-4, 6-9, and 11-20 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The most relevant prior art of record (Murray reference) teaches a telecommunication system comprising a wireless device including a positioning controller and a communications controller; and an administrative device for receiving a user-defined boundary and time and date associations and receiving alerts from said wireless communication device via said communications controller when said positioning controller determines that said wireless devices is outside said user-defined boundary at an associated time and date. The most relevant prior art of record (Jones reference) also teaches the user [of a wireless device] could specify an override condition designating his or her wireless phone during that period of time, after which notifications will be sent according to the normal schedule (paragraph 26). However, none of the most relevant prior art of record teaches means associated with the wireless device for sending a request to the administrative device for a change in said third-party user-defined geographic boundary at an associated time and date; and means for transmitting said change to the wireless device upon third-party approval of said change.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
